Speaking : Describe image (**Pie Chart**)

## Template:

**Introduction (Parichaya - परिचय):**

**This pie chart illustrates the proportional breakdown of** [Main Topic, e.g., energy consumption by source / a company's budget allocation] **in** [context, e.g., the year 2023 / for the XYZ project].

**Main Body (Mukhya Kura-haru - मुख्य कुराहरु):**

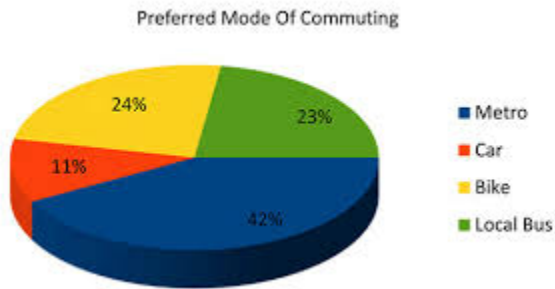

- **Overall, it is immediately apparent that** [Segment A] **constitutes the largest proportion of the whole, while** [Segment B] **represents the smallest share.**
- **Specifically,** [Segment A] **accounts for approximately** [Percentage A] **of the total** [Main Topic].
- **Following this,** [Segment C] **holds the next significant share with around** [Percentage C], **whereas other segments such as** [Segment D] **and** [Segment E] **contribute** [Percentage D] **and** [Percentage E] **respectively.**

**Conclusion (Niskarsha - निष्कर्ष):**

**In conclusion, the pie chart clearly demonstrates that** [Main Topic] **is predominantly characterized by** [Segment A], **with other segments playing lesser roles.**

"Ai powered PTE Tutor"

Lets see the example

This pie chart illustrates the proportional breakdown of preferred modes of commuting

Overall, it is immediately apparent that Metro is the most preferred mode of commuting, while Car is the least preferred.

Specifically, Metro accounts for 42% of the total preferred modes. Bike and Local Bus are the next most popular choices, with 24% and 23% respectively.

In conclusion, the pie chart clearly demonstrates that Metro is the predominant preferred mode of commuting, with other modes being less favored.
